

# OverDrive® Download Station

self-service audio book and music  
downloads in the library

## Digital Library Reserve®

By OverDrive®

OverDrive® Download Station Software enables public Internet PCs to become self-service download stations for audio books and music in the library. This Windows-based application lets patrons download copy-protected OverDrive media directly to their supported MP3/WMA player.

### Convenient for Patrons

Patrons bring their MP3/WMA player to the library, locate a public Internet PC with OverDrive Download Station Software installed, and download titles from your Digital Library Reserve collection.

When it's time to download, it couldn't be easier: the OverDrive Download Station Software prompts the user to connect their player to the Library PC. Once connected, the software tests the player for compatibility and available storage. After the downloads and transfers are completed, the patron disconnects their player and enjoys the audio book or music.

### Easy for Libraries

Libraries that offer Digital Library Reserve can install OverDrive Download Station Software on public Internet PCs. It's easy to transform the computers you already have into OverDrive Download Stations!

### Features & Benefits

- Easy-to-use wizard guides patrons step by step
- Instantly tests for device compatibility
- Self-service for patrons; limited staff involvement
- Patrons take advantage of the library's bandwidth for faster downloads
- Promotes your DLR service in the library
- Provides access to audio downloads for patrons who don't have broadband service
- Supports download of parts or portions of long audio book titles
