Have you heard about Web 2.0 but are unclear about practical applications?

This two hour tech talk will explain the basic concepts of many web 2.0 tools and demonstrate how you can practically use them to manage information and time more efficiently.

After attending this class, students will be able to:

- Explain what Web 2.0 is – how is it different from the regular old WWW
- Identify Web 2.0 technologies and identify what they are useful (or not so useful) for
- Generate ideas for how to use Web 2.0 software & programs at their libraries to improve library services and to help staff work more effectively.

Please note: This is a lecture/demonstration, not a hands-on class.

--- Earn 2 PROFESSIONAL DEVELOPMENT HOURS for attending this program. ---
